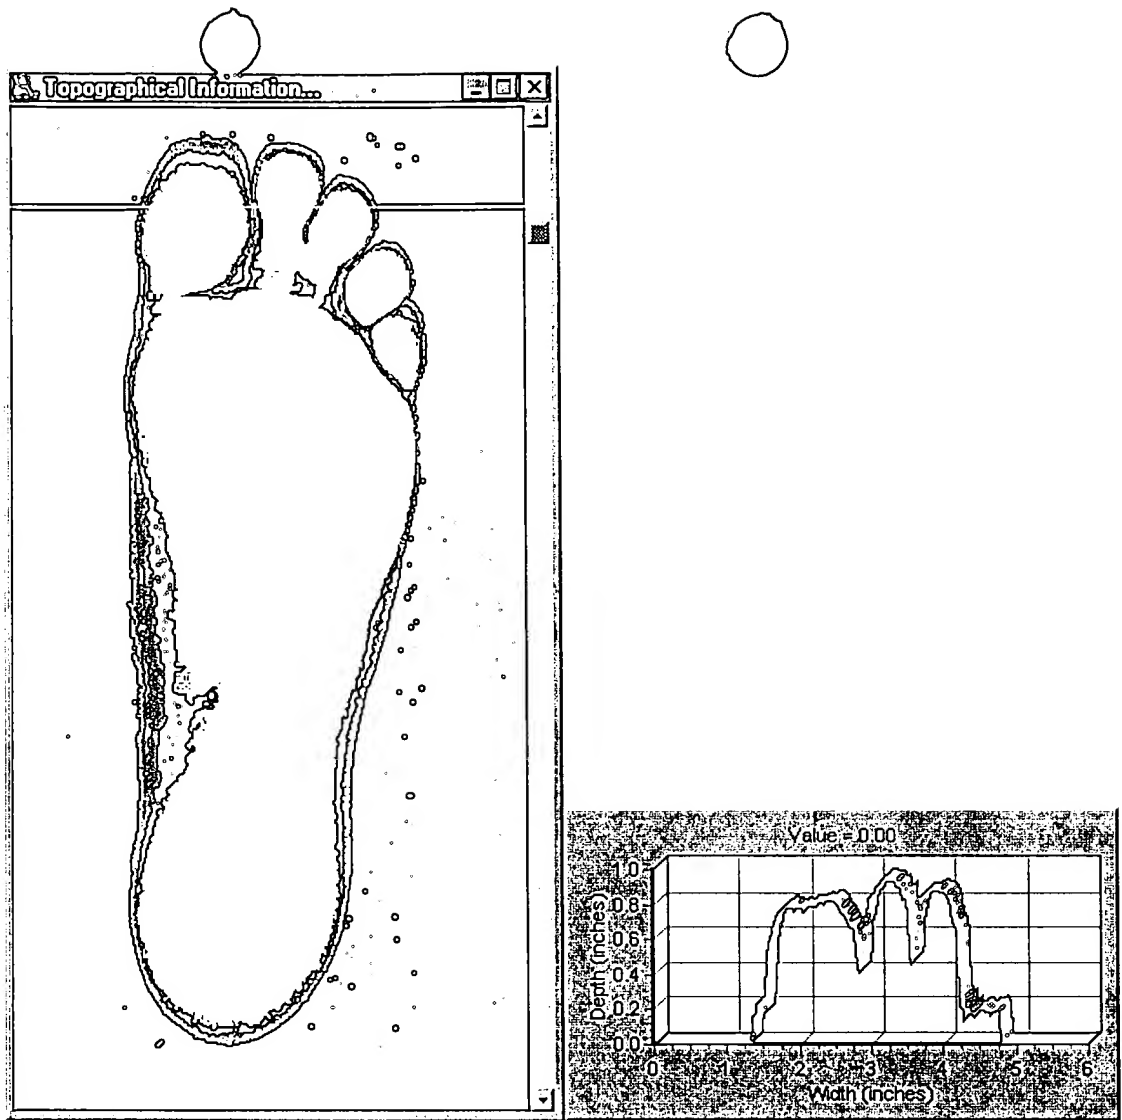

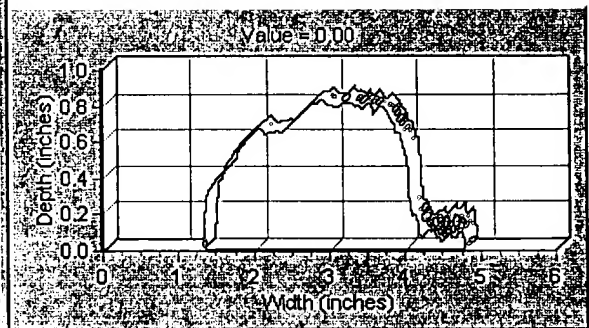

Figure 7

A topographical map of a footprint, showing the ridges and valleys of the sole of a foot. The map is oriented vertically, with the toes at the top. The ridges are represented by dark, irregular lines, and the valleys are represented by lighter, irregular lines. The overall shape of the footprint is elongated and somewhat oval. The map is displayed on a computer screen, with a window title bar at the top that reads "Topographical Information...". The window has standard minimize, maximize, and close buttons. The background of the window is white, and the footprint is centered. There are some small, dark specks scattered around the footprint, possibly representing noise or artifacts from the scanning process.
